

Exhibit #177

1 THE COURT: Can you all see this? It might be
2 better if you have him stand down there.

3 (The witness left the witness stand.)

4 A. We simply use this chemical and place drops on it
5 and then we go over the particular part of the hand that this
6 control told you, it said left hand or right hand or left
7 palm.

8 Q. So if you were doing my hand, how would you do it?
9 Show us just how you would do it.

10 A. I would do this over the entire area, and it would
11 pick up whatever there was.

12 Q. OK. Go back to the stand, and put the kit back
13 together.

14 (The witness returned to the witness stand.)

15 Q. So what you have just showed the jury that you did to
16 my hand, you did to Charlotte's hand at the scene of the
17 apartment, right?

18 A. Yes, sir.

19 Q. You did that out there?

20 A. Yes.

21 Q. And what you testify that you did with the Scotch
22 tape, you did some six hours later at the autopsy?

23 A. At the autopsy.

24 Q. OK. Now when you complete this neutron test--this is
25 a sterile procedure, that's why you use gloves?
